MIRRORED LINELITE PANEL (US Item # 37901; CN Item # 379r01)

ABOUT THIS PRODUCT:

The Mirrored Linelite Panel comprises of a number of flexible colored plastic strands that may be safely handled. They are suspended in front of an acrylic mirror in order to heighten the effect. The plastic from which the strands are manufactured responds to ultraviolet light. This means that when they are subjected to low-level UV light they “glow in the dark”. The UV light is timed to turn on for approximately ten minutes. This length of time is adjustable. Press the button at the top of the panel to activate the light. The UV light source is a pair of black fluorescent tubes concealed at the top of the panel. These tubes are protected which ensures that they are inaccessible without the use of tools. The strands are safe to handle but should not be pulled excessively, bitten, or chewed. The strands are soft, do not break, do not become hot, and do not carry electricity. Use the Mirrored Linelite Panel in a darkened environment for maximum effect.

CONTENTS:

(1) Ultraviolet Panel

Please note: Fixings not included.

TO ATTACH TO WALL:

IMPORTANT: This panel weighs approximately 50 lbs. Please consider this when fixing. Also, please verify the construction of the wall to which the panel is being affixed and use the appropriate fittings.

Attach fixings such as mirror plates to the back of the panel. Fixings are not supplied as these depend on the surface to which the panel will be affixed. Check the fixings i.e. mirror plates you buy can easily support 50 lbs. You may wish to attach two mirror plates to the back of the panel at the top and two on the back at the bottom.

SAFETY:

Always supervise this product’s use.

Handle with care.

For indoor use only.

In the unlikely even of product failure, please seek advice. Only a qualified person should attempt to repair this product.

MAINTENANCE:

To access the inside of the panel:

Always disconnect from the mains before opening up the panel.

Remove the whole panel from the wall.

Lay the panel face up on a flat, stable surface.

Remove the screws from around the side of the panel (that joins the plastic panel to its wooden back).

Carefully remove the plastic front cover (as a whole) from the wooden back.

Replace the cover with care after maintenance.

To change the lamps and fuses

The lamps and two of the fuses are accessed by carefully removing the front of the panel as described above.

LAMPS:

There are two lamps; 8W, bayonet fitting, and fluorescent black blue UV tubes. To replace them, twist the lamp away from you out of the holder, and pull down the lamps gently.

FUSES:

In the event of product failure, check the fuses in the following order:
Input, Output, Regulator, Universal Timer (T160Ma—located under ‘supply fuse’ in the box).

UNIVERSAL TIMER:

To adjust the length of time the UV tubes remain illuminated, access the Universal Timer which is preset to 10 minutes. If necessary, it may be adjusted (5, 10, 15, or 20 minutes). At the base of the Universal Timer Box are two small ‘Selector Switches’—small push switches. These are to the left of the Universal Timer fuse.

The following combinations will adjust the time of illumination:

Left Hand Switch	Right Hand Switch	Time of Illumination
OFF	OFF	5 minutes
OFF	ON	10 minutes
ON	OFF	15 minutes
ON	ON	20 minutes
